

SQUARE BOLLARDS Heavy Duty

Features:

- Fixed, square surface mount and below ground bollards are designed for traffic control situations and asset protection.
- Surface mount bollards have fully welded base plates and are suitable for installation onto any concrete surface.
- Below ground bollards have fully welded anchoring bars for installation into new concrete footings. Suitable for installation in asphalt or any soft surface where a concrete footing will be necessary.
- Manufactured from heavy wall mild steel.
- **Galvanised and powder coated or galvanised only.**
- Available in two sizes.
- Standard Class 1 reflective band (for powder coated models only).
- All our bollards are supplied complete with fixings.
- Optional chain ring kits are available for connecting chains or ropes to our bollards.

Cast aluminium knock-in caps on all square bollard models.

Below ground bollards have fully welded anchoring bars.
