

## SKIPPER RETRACTABLE TAPE BARRIER

### Features:

- Full 9 metre retractable tape unit with four-way connectivity.
- Push-button tape lock to prevent tampering.
- Fits standard 1 metre high traffic cones, post and base or drop-in units.
- Highly visible diagonally striped tape in two colour combinations.

**Material:** Polypropylene housing with nylon tape.

**Tape Finish:** Red/White or Black/Yellow diagonal stripes.

**Tape Length:** 9 metres.

PART No.	DESCRIPTION
SKIP-RW	Skipper retractable barrier 9 metre – Red/White (0.88kg)
SKIP-BY	Skipper retractable barrier 9 metre – Black/Yellow (0.88kg)
SKBELT-BY	Skipper replacement belt – Black/Yellow
SKBELT-RW	Skipper replacement belt – Red/White

### ONE METRE CONE

Traffic cone simply accepts the Skipper unit to the top of the cone or it can be screw fixed for extra security if required. Belt height 990mm.

Skipper sold separately.

PART No.	DESCRIPTION
BTC1000R	Traffic cone – 1 metre

### POST AND BASE UNIT

Post and base unit designed to accept the Skipper unit. Belt height 990mm.

Skipper sold separately.

PART No.	DESCRIPTION
SKPBY	Post and base unit – Yellow

### DROP-IN POST

63mm stainless steel post and in-floor socket, allows for quick placement or removal.

Skipper sold separately.

PART No.	DESCRIPTION
SKDIP	Drop-in post – Stainless steel
TS50-SS	In-floor socket for SKDIP

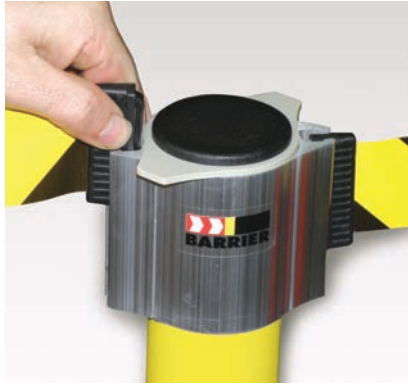

### CONE MOUNT RECEIVER

This receiver unit is a press fit onto our 1 metre cone. Fixing screws provided for extra security. Solid aluminium construction with anodised finish and two-way connectivity allows two Skipper units to span up to 18 metres. A twist and lock cap prevents belts dislodging in windy conditions.

Skipper sold separately.

PART No.	DESCRIPTION
SKRCA	Cone mount receiver unit

### RECEIVER POST AND BASE

This receiver post pairs with the post and base units. Features solid aluminium construction, anodised finish and two-way connectivity. A twist and lock cap prevents belts dislodging in windy conditions. (Includes UPVC post, rubber base and receiver head).

Skipper sold separately.

PART No.	DESCRIPTION
SKPRP-Y	Receiver post and base – Yellow

### WALL MOUNT BRACKET

The wall mount bracket allows Skippers to be used without the need for cones or posts and can be mounted to walls or columns. It is manufactured from heavy steel components and zinc plated to resist rust.

Skipper sold separately.

PART No.	DESCRIPTION
SKWM	Wall mount bracket

### WALL MOUNT RECEIVER

This belt receiver unit can be mounted to any wall or column. Manufactured from aluminium with an anodised finish, it is both compact and attractive.

Skipper sold separately.

PART No.	DESCRIPTION
SKRC	Wall mount receiver unit

### SIGN HOLDER BRACKET

The sign holder bracket is injection moulded from durable ABS plastic. Bracket requires a 5mm hole to be drilled into the top of the Skipper cap and is attached with a single screw and nyloc nut (supplied). Accommodates printed, single or double sided, sheets up to A4 size. Free sign downloads on page 53.

Skipper sold separately.

PART No.	DESCRIPTION
SSHB	Sign holder bracket
NSH-A4	A4 sign holder assembly

### MULTIFUNCTION LIGHT

Multifunction, rechargeable LED warning light is powered by six AA Batteries (not included). It is switchable between permanent or flashing mode and also has a light sensor for automatic low light activation. The light unit simply replaces the top housing cap on your existing Skipper for a fully integrated design.

Skipper sold separately.

PART No.	DESCRIPTION
SKLIGHT	Multifunction light – Amber
